# SIM LAB

INSTRUCTION MANUAL

INTEGRATED MONITOR MOUNT VESA 75/100

VERSION 2.2

Last updated: 23-02-2022

BEFORE YOU START:

Thank you for purchasing this Sim-Lab product! On the following pages, you will find detailed instructions on assembly. This requires only a set of simple tools and some of your time. Please check the bill of materials before starting (page 10) and make sure all the parts are delivered.
Inserting Slot-Nuts:
You got excited, finished the build, put the caps on, but forgot to install one element. Do not worry. It happens to everyone. In this diagram, you can see how to insert a Slot-Nut directly into the slot from the side. You can also use one of your smaller Hex wrenches to help wiggle the Slot-Nut in place.
Breaking tabs:
Sometimes tabs from corner brackets need to be broken off in order to fit as instructed. Place a flathead screwdriver behind the tab and tilt upwards.

Always make sure to point away from you while doing so. To know when to do this, we will show the following symbol next to the brackets.
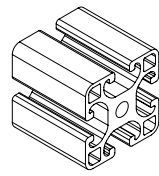

Tools needed:
